PROFILE

I am a Computer Science and Software Development student with a strong interest in full-stack web development, backend APIs, databases, and workflow automation. I have experience building web applications, integrating APIs, managing databases, and developing automation workflows.

In addition to development, I apply a software quality mindset through test case design, API testing, input validation testing, user flow testing, and bug reporting to improve system reliability.

SKILLS

Programming & Web Development:

- JavaScript, Python, C#, SQL
- HTML, CSS, React
- Node.js, Express.js
- ASP.NET MVC, AJAX
- REST API & API Integration

Database & Tools:

- MySQL, SQL Server, PostgreSQL, MongoDB
- Git / GitHub
- Docker, n8n
- Trello, Jira

Testing & Software Quality:

- API Testing with Postman / Swagger
- Test Case & Test Scenario Design
- User Flow & Input Validation Testing
- Bug Reporting

LANGUAGE

Thai	Native
English	Intermediate

EDUCATION

Computer Science and Software Development — **2023 - Present**
Sripatum University
GPX: 3.93 (6 Semesters)

ACTIVITIES

Google Student Ambassador — Cohort 2 (Selected)

- Selected to join the second cohort of the Google Student Ambassador program.

WORK EXPERIENCE

Teaching Assistant (TA): — **May 2026**
Kasetsart University, Bangkhen

- Assisted participants in building workflow automation using n8n.
- Provided guidance on node configuration, AI API integration, and automation logic.
- Helped troubleshoot workflow errors, failed executions, and hands-on activity issues.

PROJECTS

Motorcycle Store E-Commerce Platform (Full-Stack Developer & Tester)

- Developed a motorcycle e-commerce web application using C#, ASP.NET MVC, JavaScript, AJAX, SQL Server, and Docker.
- Designed and implemented core features such as product listing, user flow, database operations, and system interaction.
- Tested APIs using Postman to validate request/response data, HTTP methods, and error handling.
- Designed test cases for functionality, input validation, user flow, and database operations.

AI Chatbot & n8n Automation Project (AI Developer & Workflow Automation Developer)

- Built an AI chatbot system using Python, AI models, and prepared training data from CSV, text, websites, and PDF files.
- Developed automated workflows using n8n to connect forms, APIs, webhooks, Google Sheets, LINE, and Discord.
- Integrated AI APIs and automation workflows to process user input and generate responses.
- Tested model responses, workflow execution, API responses, data mapping, and error handling.
