PROFILE

I am an Information Technology student majoring in Computer Science and Software Development, with knowledge of full-stack development and programming fundamentals. I am seeking a Software Tester internship to apply my analytical thinking, attention to detail, problem-solving skills, and interest in test case design, API testing, and software quality improvement.

SKILLS

Programming Languages: - JavaScript, Python, C#, HTML, CSS Frameworks: - React, ASP.NET MVC, AJAX	Testing & Quality Assurance: - API Testing using Postman and Swagger - Test Scenario Design - User Flow Testing - Input Validation Testing - Bug Reporting	Database & Development Tools: - MySQL - Microsoft SQL Server - MongoDB - Git / GitHub - n8n - Docker - Trello
---	---	--

LANGUAGE

Thai	Native
English	Intermediate

EDUCATION

Computer Science and Software Development	2023 – Present
Sripatum University	
GPX: 3.93 (6 Semesters)	
English–Mathematics Program	2020 – 2023
Samutprakan School	
GPX: 3.10	

WORK EXPERIENCE

Teaching Assistant (TA):	May 2026
Kasetsart University, Bangkok	
- Assisted participants during the “AI-Powered Automation using n8n” workshop. - Provided basic guidance and support in using n8n for workflow automation. - Helped participants troubleshoot issues during hands-on activities.	

PROJECTS

Motorcycle Store E-Commerce Platform (Full-Stack Developer & Tester) - Developed a motorcycle e-commerce web application using C# ASP.NET MVC, CSS, JavaScript, AJAX, SQL Server, and Docker. - Performed manual and functional testing to verify main user flows and system behavior. - Tested APIs using Postman to validate request and response data, HTTP methods, and error handling. - Designed and executed test cases to check functionality, input validation, and database operations. - Identified bugs and improved the system based on testing results.
AI Chatbot & n8n Automation Project (AI Developer & Integration Tester) - Built, trained, and tested an AI chatbot system using Python and multiple AI models. - Prepared training data from CSV, text, website pages, and PDF files, including OCR conversion from PDF to CSV. - Developed automated workflows using n8n and AI Agent to evaluate user input and generate responses. - Integrated AI APIs, webhooks, Google Forms, Google Sheets, LINE, Discord, and Discord API for automation tasks. - Tested AI model responses, workflow execution, API responses, data mapping, and error handling. - Troubleshoot logical errors, failed executions, and response accuracy to improve system reliability.
